

1-Eama (E-commerce Platform)

This next-generation **AI-powered e-commerce platform** delivers a highly personalized shopping experience with intelligent product recommendations tailored to each user. It features **augmented reality (AR) tools** that let customers preview products in real environments and try items virtually, reducing hesitation and returns. The system supports a **multi-vendor marketplace**, enabling sellers to manage stores, track sales, and expand their reach. With **secure payment integrations**, fraud detection, and encrypted transactions, buyers and sellers remain fully protected. A built-in **AI shopping assistant** provides instant support, voice-enabled search, and personalized offers. Vendors gain access to **advanced analytics** for optimizing pricing, inventory, and marketing strategies. Designed with a **mobile-first, user-friendly interface**, the platform ensures accessibility and seamless navigation. Altogether, it creates a **smart, engaging, and future-ready online shopping ecosystem**.

This screenshot shows the registration page of the Eama Group website. The browser's address bar displays 'localhost:8081/Register'. The navigation bar is identical to the home page. The main content area features a 'Sign Up Now' form with the following fields: 'Username' (containing 'osos'), 'Password' (masked with dots), 'Confirm Password', and 'Email'. A blue 'Register' button is located at the bottom of the form. The Windows taskbar at the bottom shows the system clock as 12:54 AM on 5/29/2024.

Healthy and Natural Food

It's true you are what you eat. Foods that contain unnatural ingredients are surprisingly quick to prepare and cheap. But you will pay a heavy price later. So, be mindful about the food choices you make now.

7. MatchUp:

MatchUp is a digital platform I built to host and manage both sports and eSports tournaments. It allows users to create, join, and participate in competitions while providing features like tournament details pages, participant management, live streams/VODs integration, and community interaction. The system was developed using **HTML, CSS, JavaScript, PHP, and MySQL (phpMyAdmin)**, with full **CRUD operations, authentication, and dynamic data rendering** for tournaments, teams, venues, and services.
